

Educational Music Service • Bowing Masters Collection

This unprecedented collection consists of copies of first desk string parts from the libraries of major symphony orchestras. They may be rented by orchestras or conductors for the purpose of transferring bowings and editings to their own sets of parts.

Through the generous cooperation of the contributing orchestras, we are able to offer this valuable resource of bowings for the standard orchestral repertoire. The rental fee for each work entitles you to the use of a set of loose-leaf copies of principal string parts for that work for a period of one month.

Registration is required before you may take advantage of this service. Even if you have no need now, we would suggest that you request a registration blank, complete it and return it to us to save time in the future. There is no cost for registration.
